DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations as now claimed in claim 16 (these limitations have been discussed in the previous action) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1,3-5,7-13,16,17,20 are allowed.

Art Unit: 2873

1. The following is a statement of reasons for the indication of allowable subject matter: The limitations of “a nose bridge connecting said inner lenses, at least one fastener means comprising a plastic prong including a pair of spaced hollow bushings connected by a bight adjacent one of said inner lenses, said bushings extending into a pair of spaced openings defined by at least one of said inner lenses, an end portion connected with said lens portion interiorly of said inner lenses, said end portion being suitable for attachment to a leg connected with an outer lens overlying one of said inner lenses, said end portion comprising a magnet or a material attracted to a magnet, and a support arm connecting said plastic prong with said end portion, said support arm extending laterally outwardly of said plastic prong” in combination with the claimed subject matter are not taught or fairly suggested by the prior art or any combination thereof. These limitations could be allowable over the prior art of record.

Conclusion

2. This application is in condition for allowance except for the following formal matters:

The objection to drawings as discussed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
